Cognitive Fitness

Train your focus
See your progress

Reaction and biofeedback tests, real reports and an on-device coach, rebuilt from the ground up in Flutter.

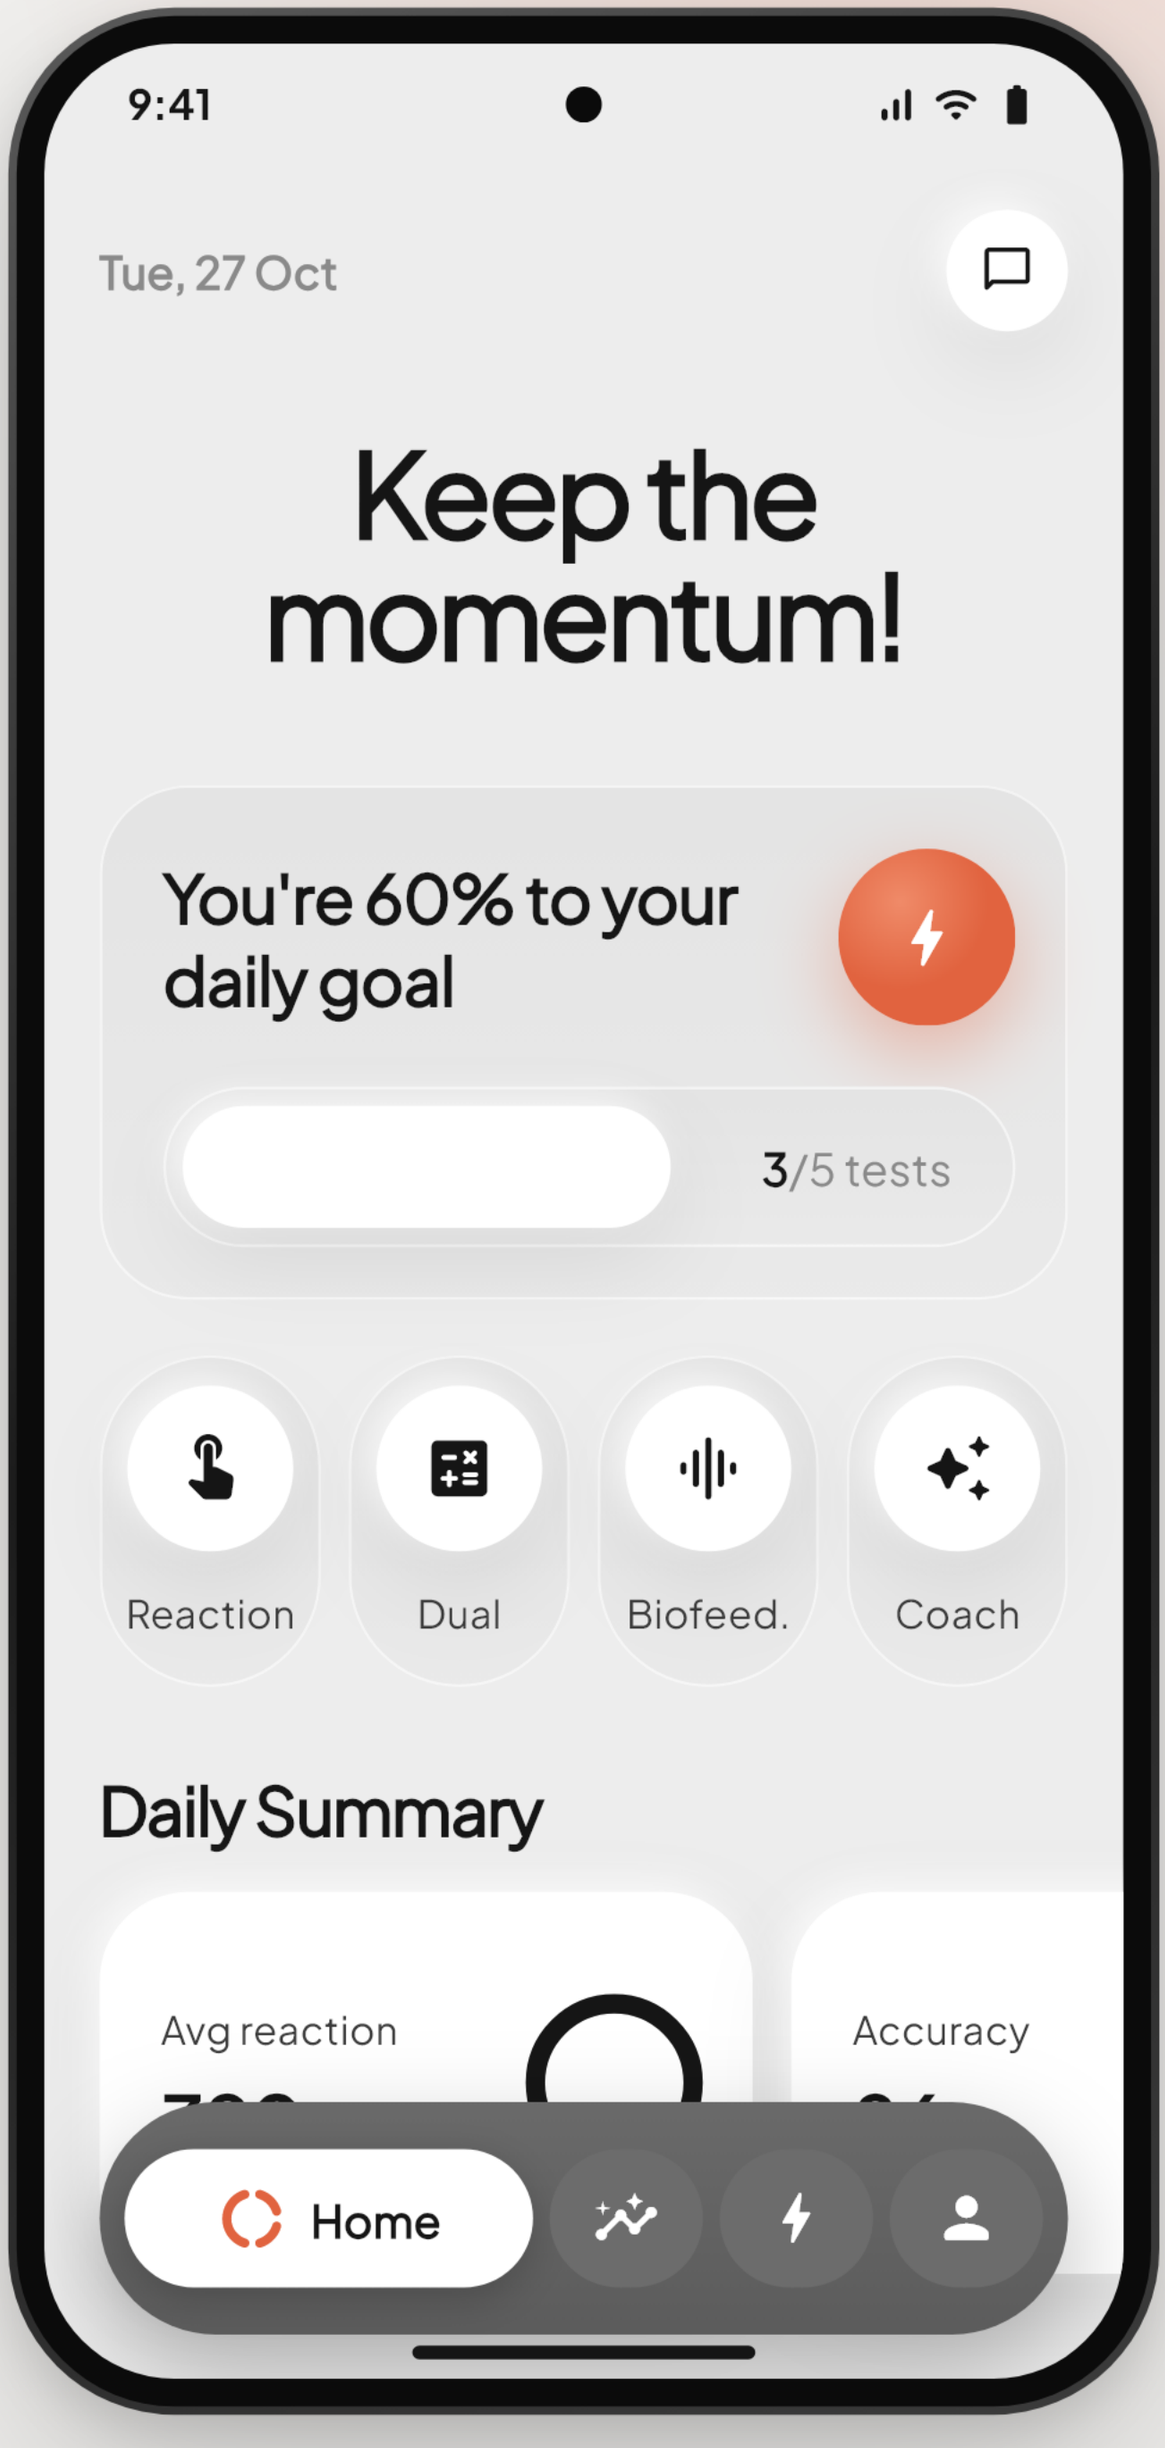

HOME DASHBOARD

Your day at a glance

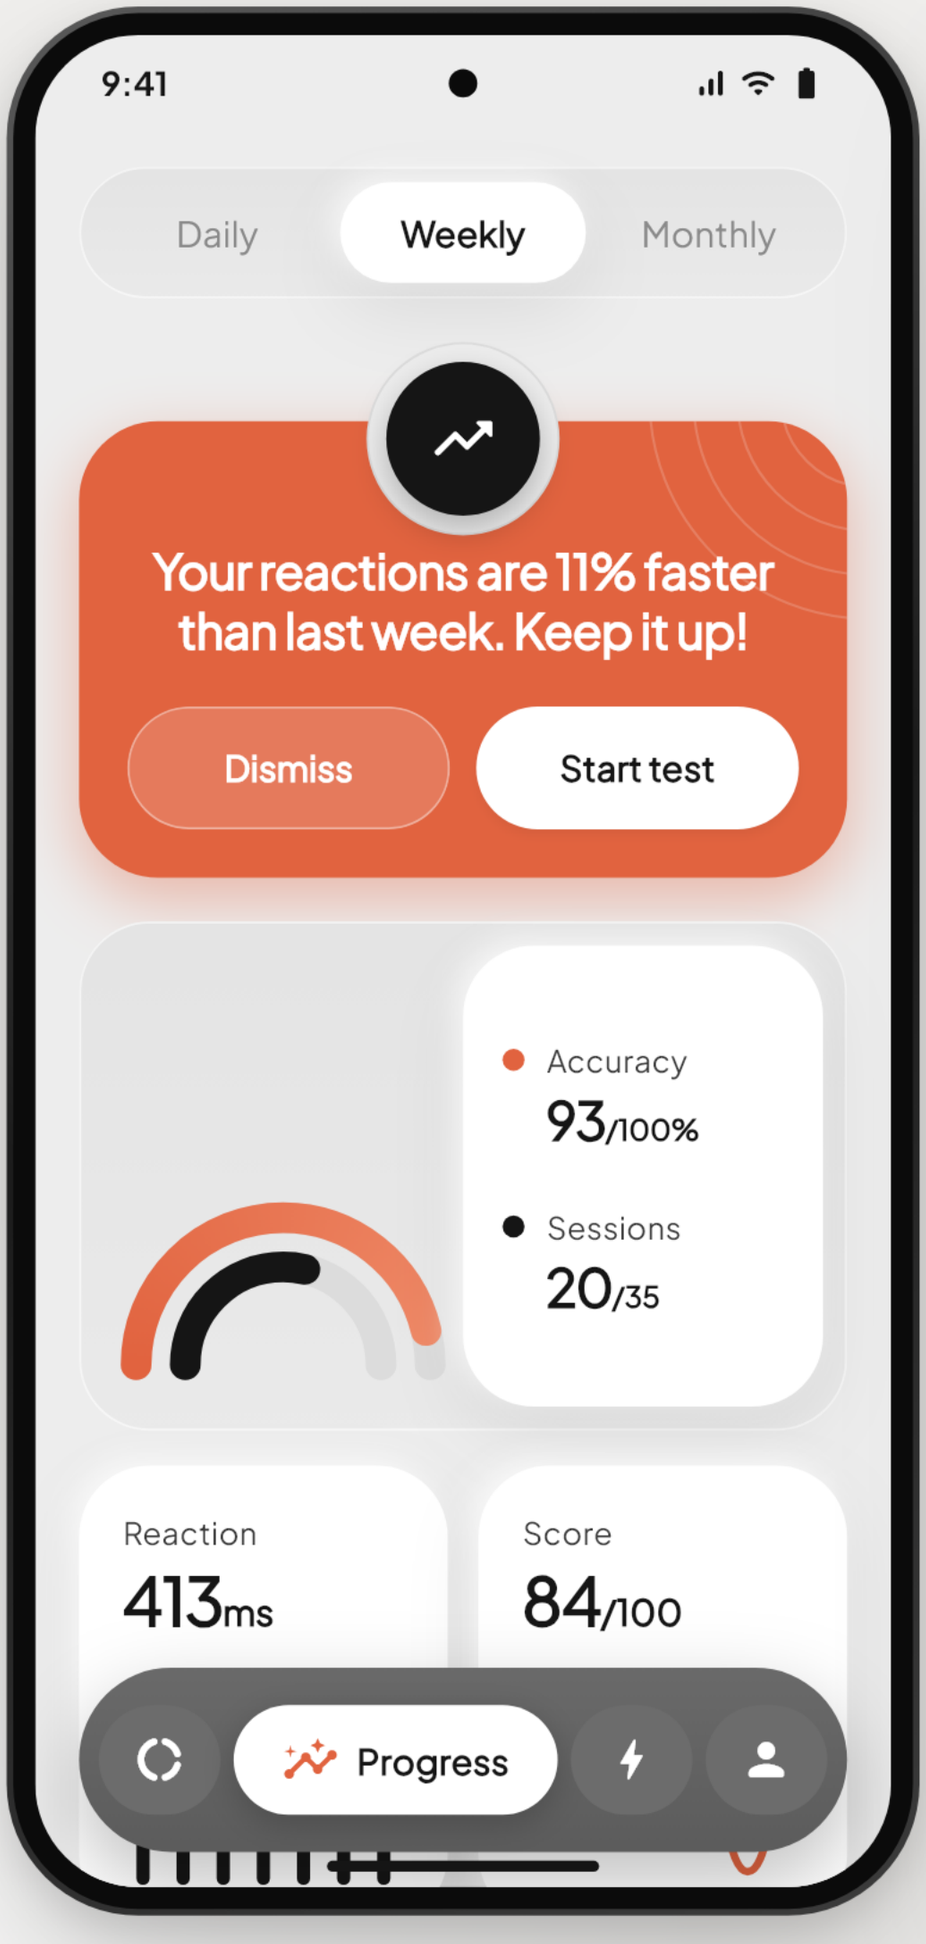

Everything that matters today on one calm screen.

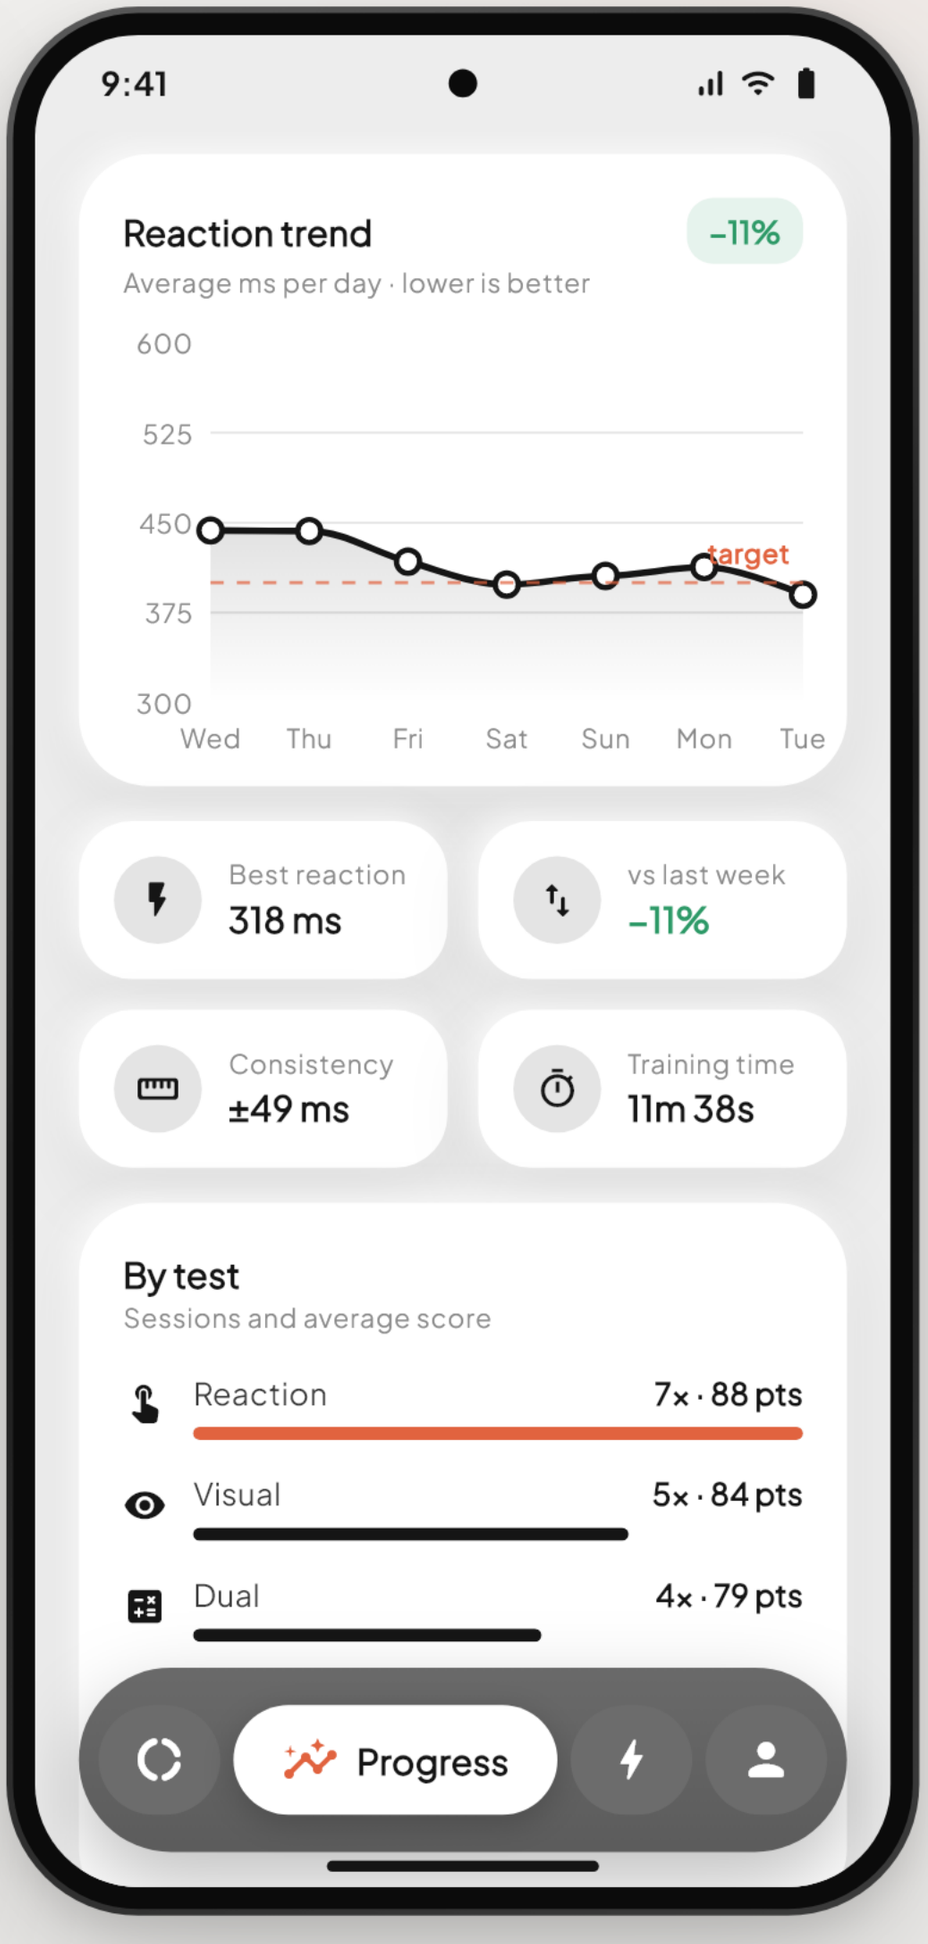

- Daily goal that fills as you train
- Readiness score and streaks
- One-tap start for your next test

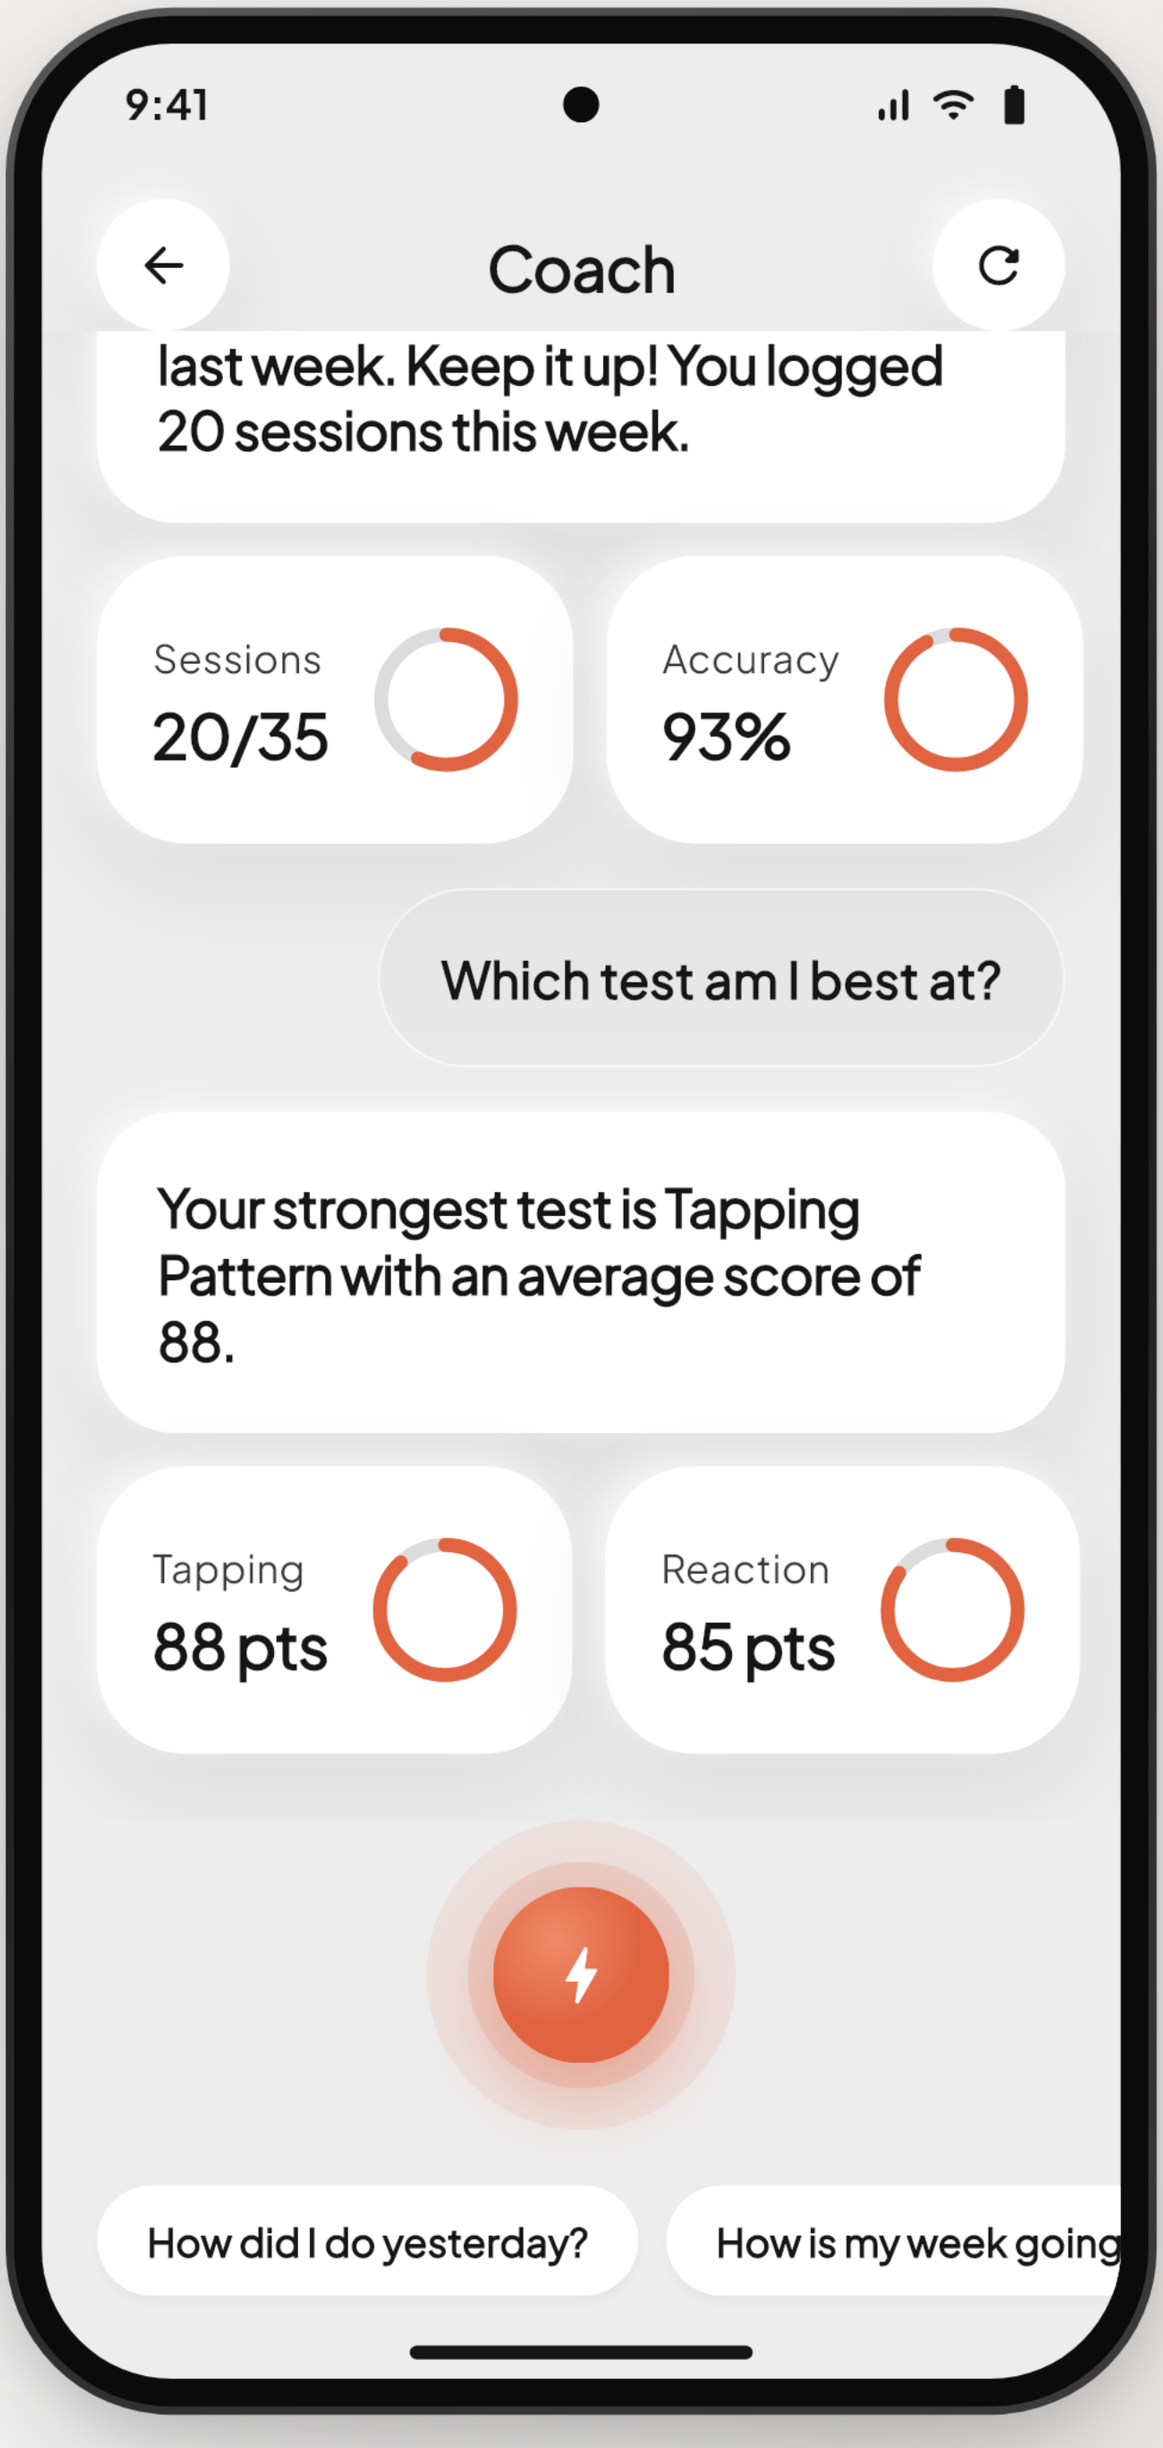

Reports that explain your progress

Daily, weekly and monthly views with trend charts, a personal target and clear insights.

PROGRESS COACH

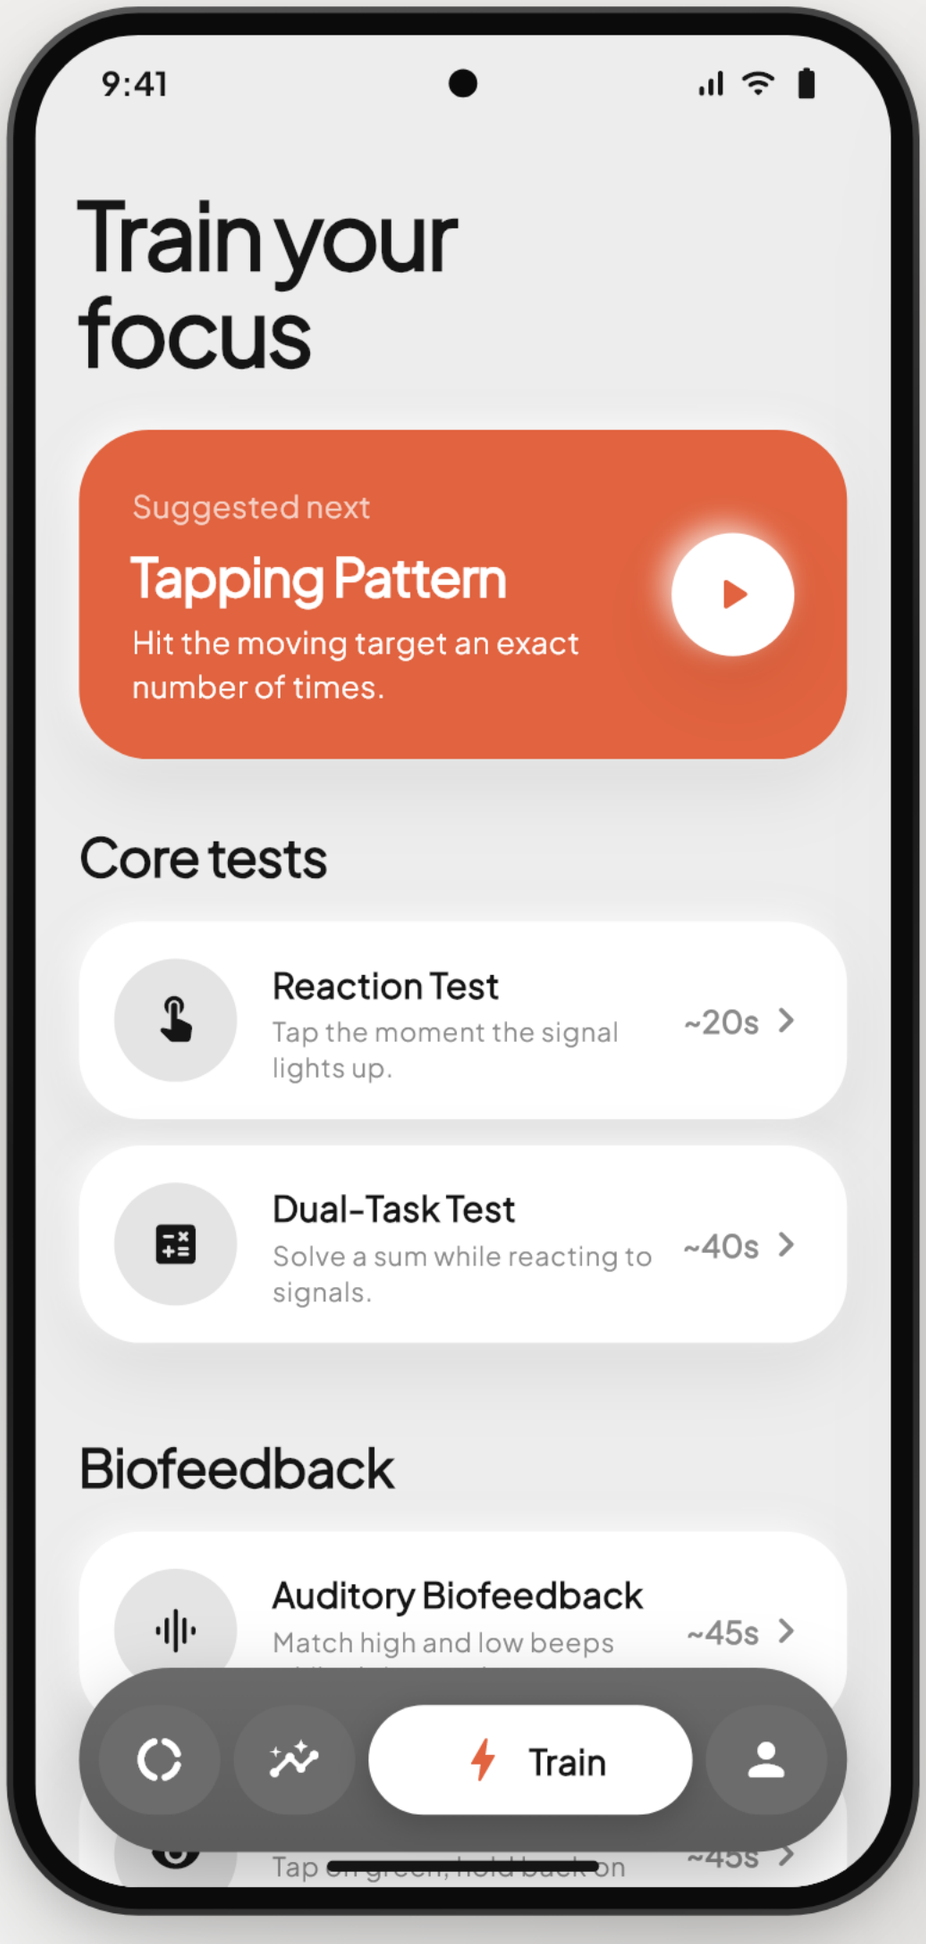

Ask how you're doing

Answers come from your own test history, stored on your device.

- Daily and weekly recaps
- Your strongest test and streak
- What to train next

Five tests
Instant feedback

Reaction, dual-task, auditory, visual go/no-go and tapping, each scored 0–100 against your own average.

UNDER THE HOOD

Clean MVC architecture

Each layer has one job, so screens stay simple and the logic stays testable.

Views

Widgets only. They read controllers and never touch storage.

DashboardView · ReportsView · CoachView

Controllers

ChangeNotifiers exposed with Provider, one source of truth for results.

ResultsController · ReportsController

Services

SQLite, preferences, audio and pure, unit-tested analytics.

AnalyticsService · CoachService

Models

Plain, immutable data shared by every layer.

TestResult · ReportSummary · AppSettings

Flutter 3.35 · Dart 3.9 · Provider · fl_chart · sqflite · 21 unit tests
